Profile

Senior Frontend Developer with 9+ years of experience delivering high-quality, accessible web applications for fintech and enterprise clients. Expert in React, modern UI architectures, and translating UX designs into scalable, maintainable code. Experienced in leading frontend projects, building design systems, and collaborating closely with product and UX teams. Holds a Master's in UX Design.

Skills

- **Frontend:** React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind, Sass
- **UI/UX:** Figma, Design Systems, Accessibility (WCAG 2.1), Responsive Design
- **State & Data:** Redux, React Query, REST APIs, GraphQL
- **Testing:** Jest, React Testing Library, Cypress
- **Tooling:** Git, Unity DevOps, Webpack, Vite
- **Methodologies & Leadership:** Agile, Scrum, Component-driven development, Project Leadership

Experience

Web Developer — RealTimeUk | United Kingdom | 2023-current

- Designed and delivered modular, high-performance 2D 360° and scalable 3D vehicle/vehicle related configurators using React and Three.js, driven by CSV-based configuration data.
- Delivered a scalable and modular configurator system adaptable to different models, reducing reliance on hardcoded UI logic through a fully data-driven architecture
- Played a key role in UI/UX decision-making, translating user needs and design intent into polished, intuitive, and accessible experiences.
- Developed enterprise-grade web applications using React, Redux, and REST APIs, with reusable component libraries ensuring UI consistency across projects.
- Built a modular admin dashboard to manage users, view saved configurations, automate document generation from configuration data, and manage pricing, streamlining operations and improving accuracy.
- Streamlined operational workflows through automated PDF generation of configurations and centralized pricing management.
- Led frontend development across multiple projects, owning technical direction and ensuring scalable, maintainable code delivery.

Web Developer — Tap Payments | Kuwait | 2016-2022

- Owned and developed the company's public-facing website, introducing clients to products and services through high-quality, conversion-focused UI.
- Delivered a multilingual CMS platform, supporting nine regions and multiple languages, with centralized content governance enabled.

- Operational efficiency was improved by removing hardcoded regional logic, and the flexible, modular architecture aligned with the atomic UI design system supported international expansion.
- Led UI/UX design and frontend development for multiple payment mobile applications, delivering intuitive, secure, and responsive experiences.
- Built and maintained scalable design systems with database-driven styling, enabling consistent UI across multiple apps and platforms.
- Ensured fully responsive, accessible designs across devices, improving usability and customer engagement.

Education

- **Master's in User Experience Design** — University of Central Lancashire - United Kingdom, 2023 (Graduated with Honors)
- **Bachelor's in Information Technology and Computing** — Arab Open University - Kuwait, 2016

Certifications

- **Full Stack Web Development Bootcamp** — Coded Kuwait, May 2018
- **Cybersecurity & Secure Work Practices Certification** — Huntress, 2024–2026
Topics covered: Phishing defense, malware and ransomware, password security, secure browsing, social engineering, OSINT, deepfakes, remote work security, Wi-Fi & VPNs, data protection, generative AI risks
