Profile

Senior Frontend Developer and Technical Leader with 9+ years of experience architecting scalable web applications for fintech and enterprise clients. Proven expertise in driving technical vision, mentoring engineering teams, and implementing best practices including TDD, SOLID principles, and Shift-Left development. Skilled at translating complex business requirements into maintainable, accessible solutions while fostering a culture of continuous learning and quality delivery.

Skills

- **Frontend:** React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind, Sass
- **Software Engineering & Architecture:** SOLID Principles, OO & Functional Programming, TDD, Shift-Left Practices, Design Patterns, System Design
- **State & Data:** Redux, React Query, REST APIs
- **Testing & Quality:** React Testing Library, Test-Driven Development
- **Cloud & DevOps:** Cloud platforms, AWS services, Lambda Functions, Azure, Firebase
- **UI/UX:** Figma, Design Systems, Accessibility (WCAG 2.1), Responsive Design
- **Tooling:** Git, Webpack, CI/CD pipelines, automation
- **Leadership & Methodologies:** Technical Leadership, Team Mentorship, Code reviewing, Agile, Scrum, Component-driven Development, delivery focused, Continuous Learning

Experience

Web Developer — RealTimeUk | United Kingdom | 2023-current

- Led frontend development across multiple projects, driving technical vision and establishing best practices in component architecture, code quality, and maintainability. Mentored junior developers on SOLID principles and modern React patterns, fostering a culture of continuous learning and high quality delivery.
- Designed and delivered modular, high-performance 2D 360° and scalable 3D vehicle configurators using React and Three.js, architected with a fully data-driven architecture that reduced reliance on hardcoded logic and enabled seamless adaptability across different models.
- Collaborated closely with Product, UX, Engineering, and Enterprise Systems teams to translate user needs and business objectives into accessible, maintainable web solutions, ensuring alignment between technical architecture and strategic goals.
- Implemented test-driven development (TDD) practices across the team, establishing React Testing Library as a standard for unit and integration testing, improving code reliability and reducing production defects.

- Built a modular admin dashboard for managing users, configurations, automated document generation, and pricing—streamlining operations and improving accuracy while maintaining scalable, reusable component architecture.

Web Developer — Tap Payments | Kuwait | 2016-2022

- Owned and developed the company's public-facing website and delivered a multilingual CMS platform supporting nine regions and multiple languages with centralized content governance, enabling international expansion while eliminating hardcoded regional logic.
- Led UI/UX frontend development for multiple payment mobile applications, delivering intuitive, secure, and responsive experiences that prioritized user accessibility and engagement across devices.
- Built and maintained scalable design systems with database-driven styling, ensuring consistent UI across multiple apps and platforms while enabling rapid feature development and reducing maintenance overhead.
- Collaborated with cross-functional teams to establish design and development standards, ensuring all solutions met accessibility requirements (WCAG 2.1) and aligned with product and business objectives.

Education

- **Master's in User Experience Design** — University of Central Lancashire - United Kingdom, 2023 (Graduated with Honors)
- **Bachelor's in Information Technology and Computing** — Arab Open University - Kuwait, 2016

Certifications

- **Full Stack Web Development Bootcamp** — Coded Kuwait, May 2018
Covering ReactJs, ReactNative, Django, Python.
- **Cybersecurity & Secure Work Practices Certification** — Huntress, 2024–2026
Topics covered: Phishing defense, malware and ransomware, password security, secure browsing, social engineering, OSINT, deepfakes, remote work security, Wi-Fi & VPNs, data protection, generative AI risks
